VISION STATEMENT: OUR VALUES AND GOAL

As a business, we have a wide range of clients and we are focused on continuous growth to become the leading provider of safe products while maintaining the highest quality standards. Our commitment to delivering safe food is driven by our desire to achieve optimal performance in our business.

We are meeting our customer satisfaction KPI's and our focus is on continuous improvement to customer satisfaction by prioritizing their needs. We operate in a diverse range of sectors and strive to be the best in our field, aiming for our customers' complete trust. Our track record speaks for itself, and we want our customers to know that they can always rely on us for the best service. This is because we are committed to delivering safe food and maintaining high standards at all times. Our mission is to continue improving and providing traditional products in a modern and safe environment, leading the market, and achieving long-term success. To achieve this, we develop our staff by providing continuous training, sharing knowledge, and conducting regular assessments to ensure we deliver our values to our customers.

We envision a balanced and sustainable world, which is why we prioritise food safety, quality, and sustainability in our operations. These values are crucial to our future. We aim to foster a culture of shared values throughout our organisation to ensure that everyone is committed to food safety and the future of our business.

Our goal is to communicate our values more effectively through our business to ensure that everyone is on the same journey. We believe that transparency and collaboration are the best ways to bring about positive change in our industry.

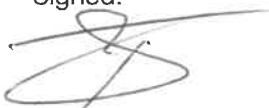

VALUES:

1. People
2. Food Safety
3. Quality
4. Sustainability
5. Customer Satisfaction

GOAL:

Maintain customer trust and satisfaction through our values for long-term success to lead the market.

Signed:
